

Artificially intelligent or intelligently artificial: is the future of HR now?

Wednesday, 15 May 2024

13:30 - 14:30 | Room L2

Guest Speaker

Viktorija Damchevska

Head of People Operations at GrabIT

Description

The future of HR is unfolding now, thus get ready to examine the impact of AI on Human Resource Management! This fascinating presentation examines how AI is changing HR practices, like recruitment and employee management, questioning if these technologies truly embody 'intelligence' or simply replicate data-driven outcomes. The talk highlights examples where AI has been integrated into HR, addressing the potential for transformation and the ethical concerns it raises.

In the context of the **Human Resource Management** module.

Module leader: **Dr Giovanni Serafini**

Addressed to **Level 3 UG Students and Stage I PG Students**.

Limited additional opportunities are available on a first-in, first-serve basis.
